Has this horse ever had a vaccine or allergic reaction?			
Is this horse currently on any medication or supplements other than those already mentioned above?			

The statements above are true and complete to the best of my knowledge.

In order to improve the ability to obtain quality radiographs and to do a thorough dental exam and any other exams that will require the horse to remain still, the horse may need to be sedated. Seller has given approval to sedate said horse if deemed necessary by the examining veterinarian to complete any examinations or diagnostics safely, thoroughly, and effectively.
